

COVID-19 Vaccination Uptake in Ireland

Weekly Report

Autumn Campaign 2023

Week ending Sunday 12th February 2024

Latest Summary Statistics Absolute Numbers of COVID-19 Autumn Campaign Doses and Percentage Uptake of the Census 2022 Population since 18/09/2023 as of end 12/02/2024, midnight

Age Group	No. Completed Primary Course Doses	No. Autumn Booster Doses	Census 2022 Population	No. Autumn Booster doses as % Uptake Census 2022 Population
70+yrs	8	334665	538171	62.2
50-69yrs	9	318155	1157982	27.5
50+yrs	17	652820	1696153	38.5

Vaccination status definitions

- **Autumn booster**=Anyone amongst the eligible cohorts who got any booster dose on or after 18/09/2023. The groups eligible are as follows:
 - **70+ year olds:** reported percentage uptake is calculated using the CSO 2022 as a denominator
 - **50-69 year olds:** reported percentage uptake is calculated using the CSO 2022 as a denominator
 - **Health care workers:** reported absolute number based on risk factor type captured in COVAX as healthcare worker
 - **Long-term care facility residents:** reported absolute number based on risk factor type captured in COVAX as Health care workers: reported absolute number based on risk factor type captured in COVAX as long-term care facility resident
 - **Immunocompromised:** reported absolute numbers based on a person being denoted as immunocompromised at the immunisation record level in COVAX; operational performance to be monitored over the Autumn/Winter campaign to be monitored against an estimated population based on an estimate of 106,000 (the number of persons noted as immunocompromised based on their last vaccination)
 - **Clinically vulnerable:** reported absolute number based on risk factor name captured in COVAX as medical, excluding risk factor type noted as pregnant
 - **Pregnant:** reported absolute number based on risk factor type captured in COVAX as pregnant
 - As well as these risk groups NIAC guidance states that access to an autumn booster vaccine should be available for those who, following discussion of their reasons with a health care provider (e.g., GP, pharmacist or vaccination centre), request vaccination. Therefore, there may be people who do receive a booster who do not fall into any of the above groups
- **Autumn/Primary Course Completed (PCC)** =The number of people over 5 years of age who have completed their primary course (fully vaccinated=two doses of two dose vaccine plan or one dose of a single Janssen vaccine, including those who are immunocompromised and have received an extra, third (primary) dose, in order to complete this course)*

* The total number of final primary course completed doses received is based on the correct combination of doses administered as per NIAC guidance

Methodology

- *Data were provided by OCIO based on data in the data lake PROD environment (includes COVAX registered vaccinations and GP administered vaccinations).*
- *DENOMINATOR USE: In this report, uptake is calculated based on Census 2022 population (n= 5,149,139 total; n=3,930,572 for adults/18+ year olds, n=4,361,794 for eligible 12+ year olds; n=4,853,724 for eligible 5+ year olds). See <https://www.cso.ie/en/releasesandpublications/ep/p-cpsr/censusofpopulation2022-summaryresults/populationchanges/>*

Absolute number of COVID-19 Autumn doses (latest received) by type administered since 18/09/2023 as of end 12/02/2024, midnight

Course	Dose Type (Latest received)	No. Doses Administered
Primary	Dose 1	423
	Dose 2	348
	Dose 3	134
	Additional Dose	102
	Total Primary Doses	1007
	Total Primary Courses	371
Booster	Booster Dose 1	14489
	Booster Dose 2	80812
	Booster Dose 3	303585
	Booster Dose 4	206692
	Booster Dose 5	155465
	Booster Dose 6	1392
	Booster Dose 7	33
	Booster Dose 8	2
	Booster Dose 9	1
	Total Booster Doses	762471
Booster and Primary Doses		763478

Absolute numbers of COVID-19 Autumn booster doses by age group administered since 18/09/2023 as of end 12/02/2024, midnight and estimated percentage uptake of the Census 2022 population

Age Group	No. Autumn Boosters Doses	Census 2022 Population	No. Autumn Boosters % Uptake Population Census 2022
All Ages	750681	5149139	14.6
6months+	750681	5120241	14.7
6months-49yrs	97861	3424088	2.9
5+yrs	750679	4853724	15.5
12+yrs	750541	4361794	17.2
12-17yrs	1525	431222	0.4
18+yrs	749016	3930572	19.1
50+yrs	652820	1696153	38.5
60+yrs	525721	1048985	50.1
50-69yrs	318155	1157982	27.5
65+yrs	438855	776315	56.5
70+yrs	334665	538171	62.2

Percentage of Autumn Booster Doses by Distribution Channel administered since 18/09/2023 as of end 12/02/2024, midnight

Uptake of Autumn Booster doses by county as a percentage of the Census 2022 population among 50+ year olds since 18/09/2023 as of end 12/02/2024, midnight

Uptake of Autumn Booster doses as a percentage of the Census 2022 population by select age group since 18/09/2023 by week, 15/10/2023 to 12/02/2024

Uptake of Autumn Booster & Seasonal Influenza doses by HSE HCWs since 18/09/2023 to 05/02/2024

In total 110,073 records for HSE Health and Care Workers were included in the analysis.

Overall Uptake

- 20,447 received COVID-19 vaccine, an uptake of 18.6%
- 40,850 received influenza vaccine, an uptake of 37.1%

Amongst those who received a vaccine:

- 18,977 (17.2% of all HSE HCWs) received both COVID-19 and influenza vaccine
- 1,470 (1.3% of all HSE HCWs) received COVID-19 vaccine only
- 21,873 (19.9% of all HSE HCWs) received influenza vaccine only
- 67,753 (61.6% of all HSE HCWs) did not receive any COVID-19 or influenza vaccine
- 89,626 (81.4% of all HSE HCWs) did not get a COVID-19 vaccine
- 69,223 (62.9% of all HSE HCWs) did not get an influenza vaccine

Uptake of Autumn Booster & Seasonal Influenza doses by Fair Deal residents in residential care facilities since 18/09/2023 to 05/02/2024

531 residential care facilities were identified from the matched dataset.

Influenza Vaccination Uptake

- Overall uptake was 86.1% with 19 (3.6%) of the 531 RCFs reporting 100% uptake.
- The vast majority of RCFs had an uptake of >75%, with 460 of 531 (86.6%) RCFs and 508 of 531 (95.7%) RCFs having an uptake of greater than 50%.

COVID-19 Vaccination Uptake

- Overall uptake was 81.6% with 13 (2.4%) of the 531 RCFs reporting 100% uptake.
- The majority of RCFs had an uptake of >75% with 404 of 531 (76.1%) having an uptake of greater than 75% and 505 of 531 (95.1%) RCFs having an uptake of greater than 50% for COVID-19 boosters.

Acknowledgements

Sincere thanks to the following for providing the data for this report:

- National Immunisation Office (NIO)
- Office of the Chief Information Officer (OCIO)
- HSE Integrated Information Services (IIS) and COVAX Implementation team of Salesforce, IBM, PWC, EY
- HSE procurement/acute hospitals/CHOs/vaccinating teams and administrators/IT staff
- HSE Health Intelligence, Strategic Planning & Transformation Unit
- NHSS for Fair Deal Resident Data
- HR-Sap for HSE HCW Data

Caveats

- Uptake data reported refers to the period up to midnight of the last day of the latest epidemiological week Monday to Sunday.
- Where county and/or age group calculation of estimated uptake exceeds 100% due to data capture issues within Coax or where the numerator exceeds the population estimate/denominator then the uptake will be rounded down to **99.9%** (unless otherwise indicated in the report).
- The population denominator used to calculate percentage uptake is Census 2022
 - <https://www.cso.ie/en/releasesandpublications/ep/p-cpsr/censusofpopulation2022-summaryresults/populationchanges/>
- Total reported doses in this report now includes all vaccination doses on the IIS/COVAX data system, including those received abroad by Irish residents.
- Autumn/Winter doses are administered to individuals in receipt of any booster dose (1-5) since 18/09/2023 who were eligible for booster dose under previous guidance but also included primary doses during this period.
- Reported figures excludes vaccination records where the death of the individual has been recorded.
- Immunocompromised status was recorded at time primary course was completed and so may not accurately reflect the current immunocompromised population or immunocompromised at time of latest vaccination.
- Details of uptake by various risk factor groups/target cohorts such as healthcare workers, long term care facility residents, the clinically vulnerable, pregnant women and the immunocompromised is not yet available
- While data is presented in terms of total number of people receiving boosters as a proportion of total population, it should be noted that not all people within these populations will be eligible for vaccination at a given time for example if they have recently had COVID-19 infection.
- The data presented will focus primarily on all booster doses administered during the Autumn/Winter campaign as the number of individuals who have completed their primary course treatment is quite small, so much so that the numbers have a negligible impact on the calculation of the overall percentage uptake of COVID-19 vaccination in the general population.
