

COVID-19 Vaccination Uptake in Ireland

Weekly Report

Spring Campaign 2025

Week ending Sunday 25th May 2025

Latest Summary Statistics Absolute Numbers of COVID-19 Spring 2025 Campaign Doses and Percentage Uptake of the Census 2022 Population and other denominator estimates between 01/03/2025 and 25/05/2025 inclusive

Age Group	No. Booster Doses	Census 2022 Population/Other estimates	No. Booster doses as % Uptake Census 2022 Population/Other estimates
70-79yrs	17741	178457	9.9*
80+yrs	55872	181027	30.9
Immunocompromised 6months+	8563	63000	13.6*
LTCF residents	24064	32000	75.2*

Spring 2025 COVID-19 Campaign Target Groups

- The COVID-19 Spring 2025 vaccination campaign begun on 03/04/2025. For the purposes of reporting however, all administered doses from 01/03/2025 (after the end of the Winter 2024 campaign on 28/02/2024) have been included in the figures presented here.
- The administration of vaccine doses follows the guidelines set down by the National Immunisation Advisory Committee (NIAC), which are available here at https://www.hiqa.ie/sites/default/files/NIAC/Immunisation_Guidelines/Chapter_05a_COVID-19.pdf.
- The primary target groups of the Spring COVID-19 2025 vaccine campaign include:
 - Those aged 80 years and older.
 - Those aged 70-79 years who did not receive a COVID-19 vaccine in the preceding 12 months.
 - Those aged 18-79 years living in long term care facilities for older adults.
 - Those aged 6 months-79 years with:
 - immunocompromise associated with a suboptimal response to vaccination
 - Pregnant adolescents and adults (recommended all year and not seasonal).
- For those aged 6 months-79 years who are immunocompetent, a dose of a COVID-19 vaccine in Spring 2025 is not routinely recommended.
- For those aged 70-79 years who did not receive a COVID-19 vaccine in the preceding 12 months, a dose of COVID-19 vaccine is recommended in Spring 2025.
- For pregnant adolescents and adults, a COVID-19 vaccine once in pregnancy is recommended, if it is more than six months since their previous COVID-19 vaccine or infection. This recommendation is not seasonal and applies all year. COVID-19 vaccine can be given at any stage in pregnancy, ideally given between 20-34 weeks' gestation.

Methodology

- *Data were provided by OCIO based on data in the data lake PROD environment (includes COVAX registered vaccinations and GP administered vaccinations).*
- *DENOMINATOR USE: In this report, uptake is calculated based on Census 2022 population. See <https://www.cso.ie/en/releasesandpublications/ep/p-cpsr/censusofpopulation2022-summaryresults/populationchanges/>*

Summary Findings I

Between 01/03/2025 and 25/05/2025

- **Total:** 84,121 COVID-19 booster doses reported
- **Age Group:** Booster dose uptake among
 - 70-79 year olds was 9.9%*
 - 80+ year olds, it was 30.9%
- **Gender:** Booster uptake was highest at 85+ years of age among males at 35.1% and among females at 32.0%
- **Vaccination Location:** Of the booster doses administered
 - 49.9% were in GP clinics
 - 30.6% in HSE clinics
 - 19.5% in pharmacies
- **County of Residence:** Uptake *as a proportion of all booster doses administered nationally* was highest at
 - 46.8% among 80+ years olds in Co. Wicklow
 - Uptake in Co. Dublin of 42.7% in the 80+ age group was significantly above the county mean uptake of 30.9%

* The 70-79 year old denominator used is based on an eligible population of 178,457 that did not get vaccinated in the past 12 months (not census 2022 population of 357,144 as cited previously) was obtained from the HSE Access & Integration Office on 13/05/2025

Summary Findings II (including caveats)

Between 01/03/2025 and 25/05/2025

- **Pregnant women:** 119 booster doses administered under 60 years of age; uptake nationally was 1.3% among an estimated target pregnant population of 9,002 (estimate based on live births recorded in 2022 by GRO in April and May)
- **LTCF residents:** 24, 064 booster doses have yet been administered; uptake *as a proportion of all booster doses administered to LTCF residents nationally* was highest in Co. Dublin at 30.9% and in Co. Cork at 11.% of the booster doses administered; uptake nationally was 74.0% among an estimated LTCF resident population of 32,000**
- **Immunocompromised:** 8,563 booster doses administered; uptake nationally was 13.6% among an estimated target population of 63,000***

** The denominator of 32,000 is based on the maximum bed capacity of all elderly based residential based facilities as recorded on the HSE health service directory as of April 2025

*** This figure is based on the number of individuals who are flagged on the COVAX/IIS system as being immunocompromised (IC) and also who have been assessed as IC at both the account and vaccination record levels after primary vaccination and at the time of primary vaccination

- A combined risk factor denominator is not available for each 5year age groups from 6 months to 69 years for those who are immunocompromised, a pregnant woman, a RCF resident and/or with an underlying medical conditions, so with no alternative, the Census 2022 population has been used instead to estimate uptake, see slide #7.

COVID-19 Booster Doses by Age Group and Target Group between 01/03/2025 and 25/05/2025 inclusive

Period	Last Dose Course	Last Dose Classification/Type	6 months-4 years of age eligible for vaccination	5-11 years of age eligible for vaccination	12-59 years of age eligible for vaccination	60-69 years	70-79 years	80+ years	60+ years	6 months +	LTCF residents 18-59 years*	LTCF residents 60+ years*	Pregnant	HCWs	All
01/03/2025 to 26/05/2025	Course2	Booster	1	78	5017	5412	17741	55872	79025	84121	1117	22934	129	82	84121
19/05/2025 to 25/05/2025	Course2	Booster	1	0	421	342	986	1834	3162	3584	110	359	13	2	3584

*HCWs are not a target group of the current Spring 2025 campaign

* See CAVEATS on slide # 5

COVID-19 Booster Doses by Age Group and Target Groups* between 01/03/2025 and 25/05/2025 inclusive

Age Group	No. Boosters	Census 2022 Population/Other denominator estimates	No. Booster doses % Uptake Population Census 2022/Other denominator estimates
All Ages	84121	5149139	1.6
6months+	84121	5120241	1.6
6months-49yrs	2501	3424088	0.1
5+yrs	84120	4853724	1.7
12+yrs	84042	4361794	1.9
12-17yrs	40	431222	0.0
18+yrs	84002	3930572	2.1
50+yrs	81620	1696153	4.8
60+yrs	79025	1048985	7.5
50-69yrs	8007	1157982	0.7
65+yrs	76772	776315	9.9
70+yrs	73613	538171	13.7
12-69yrs	10429	3823623	0.3
6months-4yrs	1	266517	0.0
5-11yrs	78	491930	0.0
12-59yrs	5017	3312809	0.2
60-69yrs	5412	510814	1.1
70-79yrs	17741	178457*	9.9
80+yrs	55872	181027	30.9
Immunocompromised 6months+	8563	63000	13.6
HCWs	82	250000	0.0
Pregnant women	119	9002	1.3
LTCF residents	24064	32000	75.2

Percentage of Spring 2025 COVID-19 Booster Doses by Age Group* by Epi Week administered between 01/03/2025 and 25/05/2025 inclusive

Age Group denominator based on census 2022

Percentage of Spring 2025 COVID-19 Booster Doses by Specific Target Groups by Week administered between 01/03/2025 and 25/05/2025 inclusive

Approximate denominator estimates:
Immunocompromised 6months+ 63,000
LTCF residents 32,000

* See CAVEATS on slide # 5

Uptake of Spring 2025 COVID-19 Booster Doses as a percentage of the Census 2022 population by age groups* and gender administered between 01/03/2025 and 25/05/2025 inclusive

Age Group denominator based on census 2022

Uptake of Spring 2025 COVID-19 Booster Doses by county as a percentage of the Census 2022 population among 80+ year olds between 01/03/2025 and 25/05/2025 inclusive

Age Group denominator based on census 2022

Number of COVID-19 Spring 2025 booster doses among RCF residents by age and gender administered between 01/03/2025 and 25/05/2025 inclusive

Number of COVID-19 Spring 2025 booster doses among Immunocompromised by age and gender administered between 01/03/2025 and 25/05/2025 inclusive

Percentage of Spring 2025 COVID-19 Booster Doses by Distribution Channel administered between 01/03/2025 and 25/05/2025 inclusive

Caveats I

- Uptake data reported refers to the period up to midnight of the last day of the latest epidemiological week Monday to Sunday.
- Where county and/or age group calculation of estimated uptake exceeds 100% due to data capture issues within Coax or where the numerator exceeds the population estimate/denominator then the uptake will be rounded down to **99.9% (unless otherwise indicated in the report)**.
- Total reported doses in this report now includes all vaccination doses on the IIS/COVAX data system, including those received abroad by Irish residents.
- Reported figures excludes vaccination records where the death of the individual has been recorded.
- While data is presented in terms of total number of people receiving boosters as a proportion of total population, it should be noted that not all people within these populations will be eligible for vaccination at a given time for example if they have recently had COVID-19 infection.

Caveats II

- The data in this report are based on the vaccination records stored on the COVAX system. The vaccination status and other variables on the person's account and vaccination record such as risk factors and cohorted groupings are as recorded on this system. For values recorded on the person's account, these may not be updated at each vaccination event depending on them being provided by the vaccine recipient and recorded at the time of vaccination.
- Furthermore, for vaccinations given at GP practices and pharmacies, these other variables are not necessarily mandatory at the source of record (GP Practice or Pharmacy System) and so may not update changes on the person account in COVAX. As a result, in some cases, the data may reflect a historic value (such as risk factor or cohort).
- In addition, a person may have more than one risk factor for a given vaccination event, but all relevant risk factors may not be recorded. For example, as resident in a residential care facility status is considered a risk factor, those who also have a medical condition (another risk factor) are likely to be recorded on IIS/COVAX with the latter rather than as a resident in a residential care facility, thereby resulting in an under-reporting of vaccinated residents in a residential care facility.
- Also, cohorting (such as immunocompromised) is dependent on this information being supplied by the vaccine recipient at the time of vaccination and this being recorded on the system of record. Therefore, this data presented in this report is based on the vaccination status of individuals registered on the COVAX system based on their last dose received.
- This means that the risk factor profile of those same individuals may not reflect their actual status at that same time for the reasons explained above.
- The data presented in this slide set focusses exclusively on all booster doses administered during the current campaign as the number of individuals who have completed their primary course treatment is quite small, so much so that the numbers will have a negligible impact on the calculation of the overall percentage uptake of COVID-19 vaccination in the general population.

Uptake of Spring 2025 COVID-19 Booster doses by Fair Deal residents in residential care facilities between 01/03/2025 and 26/05/2025

526 residential care facilities were identified from a matched dataset:

COVID-19 Vaccination Uptake

- **Between 01/03/2025 and 26/05/2025, overall uptake among Fair Deal residents was 75.0% (n=17,796/23,739)**
 - 9 locations (1.7%) where no vaccinations were reported, or uptake was $\leq 10\%$
 - 14 locations (2.7%) had an uptake $\geq 10\%$ and $< 50\%$
 - 207 locations (39.4%) had an uptake $\geq 50\%$ and $< 75\%$
 - 238 locations (45.2%) had an uptake $\geq 75\%$ and $< 90\%$
 - 53 locations (10.1%) had an uptake $\geq 90\%$ and $< 100\%$
 - 5 locations (1.0%) had an uptake of 100%

Acknowledgements

Sincere thanks to the following for providing the data for this report:

- National Immunisation Office (NIO)
- Office of the Chief Information Officer (OCIO)
- HSE Integrated Information Services (IIS) and COVAX Implementation team of Salesforce, IBM, PWC, EY
- HSE procurement/acute hospitals/CHOs/vaccinating teams and administrators/IT staff
- HSE Health Intelligence, Strategic Planning & Transformation Unit
- NHSS for Fair Deal Resident Data
- HR-Sap for HSE HCW Data
