

**Weekly Evidence Surveillance 14/11/2025**

Source	Item	Pub Date	Details	Reviewer	Public Health Theme
<a href="#">ECDC</a>	<a href="#">Seasonal surveillance of dengue in the EU/EEA</a>	14/11/2025	Since the beginning of 2025 and as of 12 November 2025, three countries in Europe have reported cases of dengue: France (29), Italy (four), and Portugal (two). This week, no new cases of dengue have been reported to ECDC.	MW	Emerging Infectious Diseases
<a href="#">ECDC</a>	<a href="#">Rapid scientific advice on protecting infants against respiratory syncytial virus disease for the European 2025/26 winter season</a>	13/11/2025	This document outlines effective ways for European Union and European Economic Area (EU/EEA) countries to mitigate the impact of RSV disease in infants through immunisation interventions. The target audience for this document is policymakers and those working in public health institutes.	MW	Vaccination Preventable Disease Guidance
<a href="#">ECDC</a>	<a href="#">A living systematic review and meta analysis on the efficacy and safety of respiratory syncytial virus vaccines</a>	13/11/2025	Respiratory syncytial virus (RSV) is a prevalent and pervasive highly transmissible virus within the family Pneumoviridae, leading to respiratory illness of varying severity in humans. Most individuals experience their initial infection during early childhood, with near universal exposure by age two.	MW	Vaccination Preventable Disease Guidance
<a href="#">ECDC</a>	<a href="#">Monthly updates: Seasonal surveillance in humans and</a>	12/11/2025	In 2025, and as of 5 November 2025, 14 countries in Europe reported 1 096 locally acquired1 human cases	MW	Emerging Infectious Diseases

	<a href="#">animals in 2025 for West Nile virus</a>		of WNV infection with known place of infection.		
<a href="#">WHO</a>	<a href="#">Priority setting in tuberculosis programme planning: policy brief</a>	14/11/2025	The brief outlines the principles, processes, and practical considerations for effective priority setting in TB programme planning and provides strategies to mitigate funding challenges while maintaining the quality and continuity of life-saving TB services.	MW	Vaccination Preventable Disease Guidance
<a href="#">WHO</a>	<a href="#">Sixteenth Meeting of the WHO South-East Asia Regional Immunization Technical Advisory Group</a>	14/11/2025	The sixteenth meeting of SEAR-ITAG was conducted in a hybrid format in New Delhi, India, from 16 to 18 September 2025. This meeting marked a critical milestone in the Region's immunization efforts, focusing on accelerating progress under the RVIP 2022–2026 and initiating strategic planning for the post-2026 period.	MW	Public Health Systems & Tools/Policies/Reviews
<a href="#">WHO</a>	<a href="#">Global tuberculosis report 2025</a>	12/11/2025	The WHO Global tuberculosis report 2025 provides a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease, at global, regional and country levels. This is done in the context of global TB commitments, strategies and targets.	MW	Vaccination Preventable Disease Guidance
<a href="#">WHO</a>	<a href="#">The global smart pharmacovigilance strategy</a>	07/11/2025	The global smart pharmacovigilance strategy was developed in response to these challenges. It is built on a	MW	Cross-Cutting / Other Public Health Topics

			simple but powerful idea: safety systems do not need to be complex to be effective – they need to be designed intelligently, to build pharmacovigilance systems that are not only functional but also strategic, sustainable, and tailored to national priorities.		
<a href="#">WHO</a>	<a href="#">Global leishmaniasis surveillance updates 2024: consolidating gains and new initiatives</a>	07/11/2025	This report on global leishmaniasis surveillance follows those published in 2016–2024. Six indicators of leishmaniasis are publicly available from the Global Health Observatory (GHO). In addition, country profiles with up to 30 indicators are published from detailed data received from 45 Member States.	MW	Emerging Infectious Diseases
<a href="#">CDC</a>	<a href="#">Infant Botulism Outbreak Linked to Infant Formula, November 2025   Botulism   CDC</a>	11/11/2025	CDC, public health officials in several states, the California Department of Public Health Infant Botulism Treatment and Prevention Program, and the U.S. Food and Drug Administration, are investigating a multistate outbreak of infant botulism linked to infant formula.	MW	Emerging Infectious Diseases
<a href="#">CDC</a>	<a href="#">Salmonella Outbreak Linked to Moringa Leaf Powder   Salmonella Infection   CDC</a>	13/11/2025	Since the last update, additional Food To Live moringa powders have been recalled. CDC and FDA continue to work to identify if there are other products causing illness in this outbreak. No new illnesses have been reported.	MW	Emerging Infectious Diseases

<a href="#">CDC</a>	<a href="#">Salmonella Outbreak Linked to Bearded Dragons   Salmonella Infection   CDC</a>	07/11/2025	CDC and public health officials in several states are investigating a multistate outbreak of Salmonella infections linked to pet bearded dragons.	MW	Emerging Infectious Diseases
<a href="#">UKHSA</a>	<a href="#">Meningococcal B (MenB) vaccination programme for Gonorrhoea - GOV.UK</a>	14/11/2025	Added 'Surveillance of 4CMenB vaccination to protect individuals at higher risk of gonorrhoea'.	MW	Vaccination Preventable Disease Guidance
<a href="#">UKHSA</a>	<a href="#">Surveillance of 4CMenB vaccination to protect individuals at higher risk of gonorrhoea - GOV.UK</a>	13/11/2025	New guidance. National surveillance of targeted 4CMenB vaccination to protect individuals at higher risk of gonorrhoea infection in England.	MW	Vaccination Preventable Disease Guidance
<a href="#">UKHSA</a>	<a href="#">Meningococcal disease: laboratory-confirmed cases in England 2024 to 2025 - GOV.UK</a>	13/11/2025	Updated 'Laboratory-confirmed cases of invasive meningococcal infection in England: April to June 2025' to correct monthly period.	MW	Vaccination Preventable Disease Guidance
<a href="#">UKHSA</a>	<a href="#">Climate change and mental health report - GOV.UK</a>	13/11/2025	The climate change and mental health thematic assessment report synthesises the evidence base relating to climate change and mental health.	MW	Environment & Health
<a href="#">UKHSA</a>	<a href="#">Mpox clade 1b and clade 11b outbreak: epidemiological overview - GOV.UK</a>	13/11/2025	Updated 7 November 2025 report to include a further case of clade 1b diagnosed in the UK during October 2025.	MW	Sexual Health
<a href="#">UKHSA</a>	<a href="#">Gonococcal Resistance to Antimicrobials Surveillance Programme (GRASP) protocol - GOV.UK</a>	13/11/2025	Updated the GRASP protocol to reflect changes made to the laboratory and bioinformatics methods used to determine antimicrobial susceptibility and the removal of some antimicrobial agents from the programme.	MW	Sexual Health

<a href="#">UKHSA</a>	<a href="#">Gonococcal resistance to antimicrobials surveillance programme report - GOV.UK</a>	13/11/2025	Added 'GRASP report: data to September 2025' and 'Supplementary information: prediction of ciprofloxacin resistance from whole-genome sequencing data'.	MW	Sexual Health
<a href="#">UKHSA</a>	<a href="#">Mycoplasma genitalium antimicrobial resistance surveillance (MARS) - GOV.UK</a>	13/11/2025	Updated with MARS report 2024.	MW	Antimicrobial Resistance (AMR)
<a href="#">UKHSA</a>	<a href="#">English surveillance programme for antimicrobial utilisation and resistance (ESPAUR) report - GOV.UK</a>	13/11/2025	Added report for 2024 to 2025 plus annexe, summary and data spreadsheets.	MW	Antimicrobial Resistance (AMR)
<a href="#">UKHSA</a>	<a href="#">Nearly 400 antibiotic-resistant infections each week in 2024 - GOV.UK</a>	13/11/2025	National surveillance data published by the UK Health Security Agency (UKHSA) show that the total number of antibiotic-resistant infections in 2024 equates to an average of nearly 400 newly reported cases per week.	MW	Antimicrobial Resistance (AMR)
<a href="#">UKHSA</a>	<a href="#">Radiation workers and their health: national study - GOV.UK</a>	12/11/2025	The national registry for radiation workers (NRRW) is a long-term follow-up study of the health of radiation workers in the UK.	MW	Environment & Health
<a href="#">UKHSA</a>	<a href="#">Rapid mapping review of PHSM for respiratory pathogens other than COVID-19 - GOV.UK</a>	12/11/2025	A rapid mapping review identifying and mapping evidence on the effectiveness and unintended consequences of public health and social measures (PHSM) when used for respiratory pathogens other than COVID-19.	MW	Public Health Systems & Tools/Policies/Reviews

<a href="#">UKHSA</a>	<a href="#">The impact of climate change on health and social care services - GOV.UK</a>	12/11/2025	Climate change is increasing pressure on health and social care services, with wide-ranging impacts on mental health, service demand, and inequalities.	MW	Environment & Health
<a href="#">UKHSA</a>	<a href="#">Pre-print: Early influenza virus characterisation and vaccine effectiveness in England in autumn 2025 - GOV.UK</a>	11/11/2025	New data published today by the UK Health Security Agency (UKHSA) shows the 2025/26 vaccine is currently 70 to 75% effective at preventing hospital attendance in children aged 2 to 17 years and 30 to 40% effective in adults.	MW	Vaccination Preventable Disease Guidance
<a href="#">UKHSA</a>	<a href="#">Mpox: affected countries - GOV.UK</a>	11/11/2025	Amended 9,0218 figure (Spain) in Table 1 to 9,028.	MW	Sexual Health
<a href="#">HPRA</a>	<a href="#">2024 annual report on the sale of veterinary antimicrobials in Ireland</a>	10/11/2025	In 2024, approximately 76 tonnes of antibiotics for animals were sold in Ireland. This is similar to the amounts sold in 2022 and 2023.	MW	Cross-Cutting / Other Public Health Topics
<a href="#">HIQA</a>	<a href="#">Evidence for Policy: International review to inform the development of a national interoperability framework for secondary use health-related data exchange in Ireland   HIQA</a>	14/11/2025	The international review was conducted as part of the HealthData@IE project led by the Department of Health in collaboration with HIQA, the Health Research Board (HRB), key stakeholders in the Health Service Executive and across the health system.	MW	Public Health Systems & Tools/Policies/Reviews
<a href="#">PHS</a>	<a href="#">Vaccines for young people resources - Publications - Public Health Scotland</a>	14/11/2025	We've produced materials to help raise awareness of the importance of the vaccines offered to young people in secondary school. The resources direct users to NHS inform for further information.	MW	Vaccination Preventable Disease Guidance

<a href="#">PHS</a>	<a href="#">Guidance on use of antiviral agents for the treatment and prophylaxis of seasonal influenza - version 2</a>	13/11/2025	Updated guidance.	MW	Vaccination Preventable Disease Guidance
<a href="#">PHS</a>	<a href="#">HPV education pack - Publications - Public Health Scotland</a>	14/11/2025	We provide a range of information resources on this page to help education professionals share information about the human papillomavirus (HPV) vaccine that is offered to every S1 pupil in school.	MW	Vaccination Preventable Disease Guidance
<a href="#">PHS</a>	<a href="#">Recommendations on the minimum consideration of health in an Integrated Impact Assessment - Publications - Public Health Scotland</a>	14/11/2025	These two documents form part of the SHIAN recommendations on the minimum consideration of health in an Integrated Impact Assessment (IIA). SHIAN is the Scottish Health and Inequalities Impact Assessment Network.	MW	Public Health Systems & Tools/Policies/Reviews
<a href="#">IDSA</a>	<a href="#">Fixing more than bones: The role of antibiotic stewardship in open fractures</a>	10/11/2025	Postoperative infections continue to pose a major challenge in orthopedic surgery. When surgical site infections occur, they often result in prolonged hospital stays, increased health care costs and significant distress for patients.	MW	Antimicrobial Resistance (AMR)
